What are your big take-a-ways from this experience? What new knowledge/skills do you have after attending this session?

I gained some inspiration for doing some new things in my classroom. I have some new ideas about using the ipads to help my students collaborate and create a classroom community. I also think I

will be able to use some of the things I learned to increase student engagement. This validated so many things I already do in my classroom. I gained knowledge about integrating 21st century lessons into the units I have already created. This was a wonderful opportunity to learn from my fellow colleagues and polish the art of teaching. By having the chance to see another classroom and the work being ...

What do you still need? What questions do you have?

I'm still looking for more professional development about collecting meaningful, quantitative data. I wonder if all teachers plan ahead of time or if any of them have tried to do backwards design with their students. I'd have liked the opportunity to hear from the teacher a bit more about how this learning was incorporated into his classroom during the day. Time to work with my teaching team to plan, implement, and document learning. Would love to see more classes and share with others. The only questions that came up were about the specific units. How long do these units last? Are they ongoing ...

What do you believe will be the big take-a-ways for students?

More meaningful units that incorporate 21st C Learning and Service Learning. Units that they will remember 10 years from now! Students will be proud of their work and eager to share their learning. We'll be learning keynote! Loved seeing the way that children can share their knowledge with this program. More ideas for us to use in our classrooms and with planning. What I bring to my classroom from viewing others. Students will experience and understand what it is to be a 21st century learner. These quality experiences, whether it be writing, connecting, reflecting, or using technology, students ...

What are your next steps?

Continue implementing 21st C skills in my classroom and help grow the program through advocacy and outreach. Plan my next unit using 21st century teaching and learning. Similar answer to the above- fine tune my skills with this program and collaborate with my team teacher in planting the seeds for our next study. Planning Continue to talk with other teachers to see what they are doing in their classes. Incorporating more pictures of students, various forms of writing, and brainstorming. My next steps are to collaborate with grade level teachers and incorporate what I saw into my classroom. Reeva ...

Other Comments

It was terrific to get into classrooms and see actual student work. I thought this PD was excellent- you always want to leave your audience wanting more and I think this hit the mark! Thank You Andrea Lusk for all of your hard work and dedication! You made this PD so meaningful!! Loved seeing the work in other classrooms! Very organized, and was a "refreshing" PD experience. I wish we could have spent the 1/2 hour per classroom to enjoy what others are and have done. -It's always amazing to see the creativity of our staff and the wonderful job that they do! :) I enjoyed this learning experience ...
